Index to Volume 94

Abortificient action of prostaglandins, biophysical studies on the molecular mechanism of; conformation energy calculations on PGA_1, PGB_1 and PGE_1, 943
Activity and time in a neural system, macroscopic law for, 191
Adaptive "coin-flipping": a decision-theoretic examination of natural selection for random individual variations, 135
Address, epigenetic, replicating RNA duplexes and, 869
Adsorption, competitive, mono- and divalent, to a charged membrane in a closed system: a comparative study, 633
Amino acid pairing, 885
Anisogamous sex, a physiological barrier for the maintenance of, 801
AREF, S. (see HAUSFATER, G.), 391
ARUJA, A., VILU, R. and RAUKAS, E., Detection of periodic patterns in RNA sequences: the first encapsidated region of the TMV RNA, 457

Bacteria, Macromolecular composition of, 651
BARD, J. B. L., A membrane–carrier mechanism for generating new sources and sinks within gradient-controlled tissues—its application to regeneration in *Oncopeltus*, 689
BENEGAS, J. C., RIPOLL, D. R. and MARCHI, E., Denaturation of β-sheet structure, 111
BERETTA, E. (see MAGNANI, M.), 995
β-sheet structure, denaturation of, 111
Bilateral symmetry, orchids and insect perception, 241
Bilayer couples concept of red blood cell shape transformations, membrane bending energy in relation to, 13
Biological evolution, classical thermodynamics and tandemism, 225
Biological similarity, on the origin of, 25
Biological systems, principles of the thermodynamics of, 301
Biophysical studies on molecular mechanism of abortificient action of prostaglandins. IV. Conformation energy calculations on PGA_1, PGB_1 and PGE_1, 943
BIRKBECK, T. H. (see FREER, J. H.), 535
BREMER, H. (see CHURCHWARD, G.), 651
BROOKFIELD, J. F. Y., Interspersed repetitive DNA sequences are unlikely to be parasitic, 281
BULMER, M. G., Cyclical parthenogenesis and the cost of sex, 197

CAIRNS, S. J. (see HAUSFATER, G.), 391
Cancer, might it be a failed response to renegade mitochondria?, 173
Cancer, the three steps to; a new concept of cancerigenesis, 471
Catalysis, enzyme, physical theory of (letter), 513
Catalytic mechanism of prolylhydroxylase, a stereochemical concept for; applicability to classification and design of inhibitors, 421

Catalytic sequence, kinetic analysis of dye-linked dehydrogenases and related enzymes where the electron acceptor binds twice during the, 857
Cell cycle timer, and the helix clock, 209
Cell survival and glutathione reductase (letter), 995
Charged membrane in a closed system, mono- and divalent competitive adsorption to; a comparative study, 633
CHARLESWORTH, B., Reply to Bulmer on the cost of sex with cyclical parthenogenesis, 223
Chemical rate constants and error rates in DNA replication, on the relations between, 607
Chirality, origin of, and the isotropy of the Universe (letter), 517
CHURCHWARD, G., BREMER, H. and YOUNG, R., Macromolecular composition of bacteria, 651
CLARKE, C. H., Preferred sites of frameshift mutagenesis in AT- and GC-rich microbial DNA, 519
CLARKE, C. H., The influence of DNA base ratios on intragenic mutational spectra in prokaryotes, 671
Clock, helix: a potential biomechanical cell cycle timer, 209
Coiled-coil region, triple-standard, in tropomyosin-troponin T complex, prediction of, 743
"Coin-flipping", adaptive: a decision-theoretic examination of natural selection for random individual variations, 135
COMINS, H. N., Evolutionarily stable strategies for localized dispersal in two dimensions, 579
Competition and skewness in plantations, 909
Complex systems, phenomenological calculus for, 61
Conformation energy calculations on PGA_1, PGB_1 and PGE_1; biophysical studies on molecular mechanism of abortificient action of prostaglandin, 943
Conformation, possible, of delat-lysin, a membrane-damaging peptide of *Staphylococcus aureus*, 535
Continuous vs. discrete models of multispecies systems: how much less stable are the latter ones? (letter), 989
Continuum model: statistical implications, 783
COOPER, S., The continuum model: statistical implications, 783
COOPER, W. S. and KAPLAN, R. H., Adaptive "coin-flipping": a decision-theoretic examination of natural selection for random individual variation, 135
CORNELIUS, G. (see DRESCHER, K.), 345
Cost of sex, cyclical parthenogenesis and, 197
Cost of sex, cyclical parthenogenesis and; a reply, 223
CRAIG, R., Evolution of eusociality by kin selection: the effect of inbreeding between siblings, 119
CRAIG R., Evolution of male workers in the hymenoptera, 95
Cyclical parthenogenesis and the cost of sex, 197
Cyclical parthenogenesis and the cost of sex; a reply, 223

DASGUPTA, G. (see SKALAK, R.), 555
DAVENPORT, D. and KOHANZADEH, Y., Orchids, bilateral symmetry and insect perception, 241

DAY, J. and WILLIS, C. R., An analysis of membrane phase transition theories based on kink and jog defects, 367
Dehydrogenases, dye-linked, and related enzymes where the electron acceptor binds twice during the catalytic sequence, kinetic analysis of, 857
Delat-lysin, a membrane-damaging peptide of *Staphylococcus aureus*, possible conformation of, 535
Denaturation of β-sheet structure, 111
Deterministic and stochastic environments, diffusive logistic growth in, 253
Diffusion and substrate, influence on the heterogeneous kinetics of enzymic reversible reactions, 179
Diffusive logistic growth in deterministic and stochastic environments, 253
Dimorphism, sexual, a note on the evolution of, 107
Discrete vs. continuous models of multispecies systems: how much less stable are the former ones? (letter), 989
Dispersal, localized, in two dimensions, evolutionarily stable strategies for, 579
Divalent and monovalent competitive adsorption to a charged membrane in a closed system: a comparative study, 633
DNA base ratios, influence on intragenic mutational spectra in prokaryotes, 671
DNA, microbial, AT- and GC-rich, preferred sites of frameshift mutagenesis in, 519
DNA, repetitious, loss in proliferating somatic cells may be due to unequal recombination, 1
DNA replication error rates and elementary chemical rate constants, on the relations between, 607
DNA sequences, repetitive, interspersed, are unlikely to be parasitic, 281
DRESCHER, K., CORNELIUS, G. and RENSING, L., Phase response curves obtained by perturbing different variables of a 24 hr model oscillator based on translational control, 345
Drugs, ways to discern their presynaptic effect on neurotransmitter release, 923
DULLEMEIJER, P. (see SKALAK, R.), 555
DURUP, J., On the relations between error rates in DNA replication and elementary chemical rate constants, 607
Dye-linked dehydrogenases and related enzymes where the electron acceptor binds twice during the catalytic sequence, kinetic analysis of, 857
Dynamics, qualitative, of a network model of regulation of the immune system: a rationale for the IgM to IgG switch, 815

ECONOMOS, A. C., On the origin of biological similarity, 25
Electron acceptor binds twice during the catalytic sequence, kinetic analysis of dye-linked dehydrogenases and related enzymes where the, 857
ENGASSER, J. M. (see MARC, A.), 179
Enzyme catalysis, physical theory of (letter), 513
Enzymic reversible reactions, influence of substrate and product diffusion on the heterogeneous kinetics of, 179
Epigenetic address, replicating RNA duplexes and, 869
Error rates in DNA replication and elementary chemical rate constants, on the relations between, 607
ERSHOV, YU. A. (see GLADYSHEV, G. P.), 301
Eusociality evolution by kin selection: the effect of inbreeding between siblings, 119
Evolution, classical thermodynamics and tandemism, 225
